**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/US04/38680

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of:

- ☒ the international application in the language in which it was filed
☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
☐ filed together with the international application in electronic form.
☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/US04/38680

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>3-5</u>	YES
	Claims <u>1, 2 and 6-15</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-15</u>	NO
Industrial applicability (IA)	Claims <u>1-15</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

1. Claims 1, 2 and 6-15 lack novelty under PCT Article 33(2) as being anticipated by Reisfeld et al. (US 2003/0021720 A1). Reisfeld's invention is directed to a control system for a photocatalytic air purifier. Reisfeld disclose that the photocatalytic air purifier comprises the recited fluid handling component, substrate, catalyst and UV light source (Fig. 1 and paragraph [0022]).

2. Claims 3-5 lack an inventive step under PCT Article 33(3) as being obvious over Reisfeld '720 in view of Lentz et al. (US 6,438,971 B1) and either Yamanaka et al. (US 5,919,422) or Goswami (US 5,835,840). The difference between Reisfeld and the instant claims are the provision of the UV light source downstream of the fluid handling component, the substrate downstream from the UV light source and the photocatalyst supported on a honeycomb substrate. Lentz shows in air treatment with UV light source the placement of the light source either downstream or upstream to the evaporator coil (col. 5, lines 34-45). Yamanaka shows in a device comprising photocatalyst the provision of the photocatalyst downstream from the evaporator in air purifier and the UV light source in between the evaporator and the photocatalyst (Fig.10). Goswami shows in a photocatalytic system for indoor air quality the provision of a photocatalyst downstream from an evaporator and the UV light source in between the evaporator and the photocatalyst (Figs. 1 and 3-5). As such, the rearrangement of parts was held to have been obvious. Further, the motivation to make a specific structure is always related to the properties or uses one skilled in the art would expect the structure to have.

3. Claims 1-15 meet the criteria set out in PCT Article 33(4), and thus the industrial applicability because the subject matter claimed can be made or used in industry.
